

High streamflow advisory - ENDED

Yukon River - Carmacks

August 1, 2022 4 pm

Current conditions

The Yukon River at Carmacks peaked on June 26 and has now dropped over 1.6 m, but remains well above average for this time of year.

Weather forecast

Unsettled weather is forecast to mid-week with widespread showers and thundershowers on Tuesday, followed by drier conditions later in the week. Temperatures are expected to remain close to seasonal averages.

Water level forecast

Water levels will continue decreasing, but are likely to remain above average throughout the month of August.

Flood and travel advice

The public is advised to stay clear of the fast-flowing rivers and potentially unstable riverbanks during the high-streamflow period. Flood prone property owners are advised to have a plan in place in the event of a flood. See [Yukon.ca/floods](https://www.yukon.ca/floods) for more information.

We will continue to monitor conditions and will release advisories as necessary.

Advisory and warning levels

High streamflow or water advisory: Lake levels or river flows or levels are rising or expected to rise rapidly, but no major flooding is expected. Minor flooding in low-lying areas is possible.

Flood watch: River or lake levels are rising and will approach or may exceed banks. Areas beside affected rivers and lakes may flood.

Flood warning: River or lake levels have exceeded or will exceed banks or flood stage very soon. Areas beside affected rivers and lakes will flood.
