

Consumer Price Index, May 2025

Released by Statistics Canada – June 24, 2025

Comparing May 2025 to May 2024, the Consumer Price Index (CPI) increased 3.1% in Whitehorse (data are not available for Yukon). Whitehorse's year-over-year CPI change for the month of May 2025 (3.1%) was 1.4 percentage points higher than that for Canada (1.7%).

The main contributors to the year-over-year increase in Whitehorse CPI for the month of May 2025 were food purchased from restaurants; mortgage interest cost; and electricity. Some of these increases were offset by price decreases in inter-city transportation; traveller accommodation; and gasoline.

On a monthly basis, the CPI in Whitehorse increased by 0.4 percentage points in May 2025 compared to April 2025; nationally, the CPI increased by 0.6 percentage points.

Note to readers:

- The basket weights of goods and services used in the calculation of CPI are derived primarily from the national Household Final Consumption Expenditure (HFCE) data supplemented by the data from the Survey of Household Spending and provincial/territorial HFCE series.
- With the release of data for May 2025, the basket of goods and services used in the calculation of the CPI has been updated. The new basket weights from Statistics Canada are based on 2024 expenditure data from the most recent HFCE data, updated expenditures from the Survey of Household Spending, as well as other data sources. This ensures the relevance of the CPI as a reflection of the most recent consumer expenditure data available. The base period, in which the all-items CPI is set to equal 100, remains 2002.
