

Consumer Price Index, July 2025

Released by Statistics Canada – August 19, 2025

Comparing July 2025 to July 2024, the Consumer Price Index (CPI) increased 2.9% in Whitehorse (data are not available for Yukon). Whitehorse's year-over-year CPI change for the month of July 2025 (2.9%) was 1.2 percentage points higher than that for Canada (1.7%).

The main contributors to the year-over-year increase in Whitehorse CPI for the month of July 2025 were electricity; food purchased from restaurants; and mortgage interest cost. Some of these increases were offset by price decreases in traveller accommodation; inter-city transportation; and travel tours.

On a monthly basis, the CPI in Whitehorse increased by 0.9% in July 2025 compared to June 2025; nationally, the CPI increased by 0.3%.

Consumer Price Index, All-items July 2025 (unadjusted), 2002 = 100

	Jul '24	Jun '25	Jul '25	Jun '25 to Jul '25	Jul '24 to Jul '25
	----- % change -----				
Canada	162.1	164.4	164.9	0.3	1.7

Iqaluit	145.0	145.3	145.6	0.2	0.4

Note to readers:

- The basket weights of goods and services used in the calculation of CPI are derived primarily from the national Household Final Consumption Expenditure (HFCE) data supplemented by the data from the Survey of Household Spending and provincial/territorial HFCE series.
- Percentages in this release are rounded to the nearest decimal place. Percentage points are the actual numerical difference between two rounded percentages, such as: 2.9% – 1.7% = 1.2 percentage points.
- With the release of data for May 2025, the basket of goods and services used in the calculation of the CPI were updated. The new basket weights from Statistics Canada are based on 2024 expenditure data from the most recent HFCE data, updated expenditures from the Survey of Household Spending, as well as other data sources. This ensures the relevance of the CPI as a reflection of the most recent consumer expenditure data available. The base period, in which the all-items CPI is set to equal 100, remains 2002.
