¹ The Survey of Employment, Payrolls and Hours (SEPH) estimates are produced monthly by integrating information from three sources: a census of payroll deduction records provided by the Canada Revenue Agency; the Business Payrolls Survey, and administrative records of federal, provincial and territorial public administration employment provided by these levels of government. These monthly estimates of the job numbers by detailed industry complement information from the Labour Force Survey (LFS), which is a household survey. The LFS includes people who are self-employed, as well as workers who take unpaid leave; SEPH does not cover these groups. Industry coverage for the LFS is comprehensive; SEPH excludes industry estimates for: agriculture; fishing and trapping; religious organizations; private household workers; and military personnel of defense services. The two surveys count multiple job holders differently. In the LFS, people with more than one job are counted only once as "employed"; SEPH counts filled positions on payroll, so each job is counted separately.

² Excluding *Other services (except public administration)*.

³ Includes federal, territorial, municipal and local, and First Nation or Indigenous governments.

Average weekly earnings

The June 2025 preliminary average weekly earnings figure for Yukon was \$1,499.51. Yukon's earnings figure increased by 3.7% compared to the figure for June 2024, Canada's figure increased by 3.7% over the same period.

¹ Estimates are preliminary before the associated quarterly data are released.

² Job Vacancy and Wage Survey (JVWS) employment estimates may differ from Survey of Employment, Payrolls and Hours employment estimates because of calibration grouping and differences in scope and reference period. Additionally, JVWS data are not seasonally adjusted.

³ A job is vacant if it meets the following conditions: it is vacant on the reference date (first day of the month) or will become vacant during the month; there are tasks to be carried out during the month for the job in question; and the employer is actively seeking a worker outside the organization to fill the job. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal. Jobs reserved for subcontractors, external consultants, or other workers who are not considered employees, are excluded.

⁴ The job vacancy rate is the number of job vacancies expressed as a percentage of labour demand; that is, all occupied and vacant jobs.
