**Investment in building construction (seasonally adjusted), Yukon,
July 2020 to July 2025**

Note to readers:

- Unless otherwise stated, this release presents seasonally adjusted data with current dollar values, which facilitate month-to-month comparisons by removing the effects of seasonal variations.
- In 2024, there were delays in issuing building permits by the City of Whitehorse. These delays caused a reduction in the total value of building permits up to mid-August 2024. As a result, the value of building construction in 2024 presented in this release may be lower than usual. From mid-August 2024, the City of Whitehorse began clearing backlogs of building permit applications, which may have affected the year-over-year fluctuations in the value of building construction in this release.
- Following a period of very high price growth of building materials between 2020 and 2023, Yukon Bureau of Statistics (YBS) introduced an additional analysis of constant dollar values (2017 = 100). This analysis provided comparisons of year-over-year change adjusting for price fluctuations that affected current dollar values during this period. From January 2025, YBS is no longer providing this additional analysis of constant dollar values as growth rates in these prices have returned to pre-pandemic patterns.
