

Yukon Rent Survey Comparison of Average and Median Rent October 2015 to October 2025

This publication is a comparison of average and median rent data in Whitehorse, Watson Lake and Dawson for October 2015 through October 2025. **Data for prior periods are available upon request.** These statistics are derived from the Yukon Rent Survey, which is conducted on a semi-annual basis in April and October. Prior to 2014, the survey was conducted on a quarterly basis and only included buildings with 3 or more rental units (4 or more rental units prior to 2012). Although the methodology of the survey includes buildings with 1 or more rental units, (yukon.ca/en/yukon-rent-survey-october-2025), Yukon Bureau of Statistics continues to generate data for buildings with 3 or more rental units for historical comparisons. The tables below display these data.

Average Rent refers to the sum of rents of all units divided by the total number of units. **Median Rent** refers to the rent at the middle of the range with one-half of the rents being above the median (higher) and the other half below the median (lower).
