Note to readers:

- Month-to-month and year-to-year comparisons in this release present seasonally adjusted data with current dollar values, which facilitate month-to-month comparisons by removing the effects of seasonal variation.
- Year-to-date comparisons in this release present unadjusted data with current dollar values, which facilitate comparisons of the cumulative change throughout a calendar year.
- Data are subject to revision based on late responses, delayed construction start dates for large projects, methodological changes, classification updates, price index updates for constant dollar series, benchmarking and adjustments to ad hoc macroeconomic events.
- In 2024, there were delays in issuing building permits by the City of Whitehorse. These delays caused a reduction in the total value of building permits up to mid-August 2024. As a result, the value of building construction in 2024 presented in this release may be lower than usual. From mid-August 2024, the City of Whitehorse began clearing backlogs of building permit applications, which may have affected the year-over-year fluctuations in the value of building construction in this release.
