

Electrical Bulletin

INFORMATION FOR CONTRACTORS

July 18, 2019

If you are wiring a building with a Renewable Energy System (i.e. solar, wind etc.) effective immediately a separate permit will be required for these systems.

Please be aware that with your permit application a single line diagram is required.

Your single line diagram will include:

- Array/ Inverter characteristics (voltage, wattage)
- Disconnects, rapid shutdown, overcurrent devices
- Buss rating of panels
- Grid tie or off grid
- Battery info, terminal protection, venting
- All wire sizes
- Grounding and bonding

Mike Zakarow
