* Asterisks indicate a high proportion of "NA" responses. In 2026, questions 17, 37, 56, 57 have a relatively high (10% or more) proportion of "don't know/not applicable" responses.

States of engagement

Another way of understanding employees' experiences is by exploring their different states of engagement based on how they answered the four survey questions that measure the two characteristics in the roof of the house model (job satisfaction and organization commitment).

Generally, when employees are engaged, they are:

- Satisfied with their job, and
- Committed to their organization.

Employees' commitment and satisfaction scores tend to move in tandem. As satisfaction increases, their commitment tends to increase as well (higher engagement). As satisfaction diminishes, commitment likely also declines (lower engagement). By plotting employees' satisfaction scores against their commitment scores, we can see how employees cluster within different states.

For example, employees who are highly committed and highly satisfied (scores ≥ 75 points) are considered to be engaged. Alternatively, employees who are highly committed (scores ≥ 60 points), but are not satisfied (scores ≤ 60 points), are considered to be unhappily dedicated.

The figure displays the proportion of respondents in Corporate belonging to each of the six states graphically.

13 factors - a new approach to analyze engagement survey results

There are 13 factors that can impact the mental health of employees in the workplace. Using the engagement survey results, we can identify questions which relate to those factors and calculate an average score for each of the factors. If you want to learn more about the 13 factors, you can watch videos, explaining each factor in more depth: <https://www.youtube.com/playlist?list=PL2NuAPXp8ohZmoVaECI6sRiV9lQ25Xkld>

	2016	2018	2021	2024	2026

Publish date: September 2026

Confidentiality: During the survey administration, employees received personalized invitations and reminders. The survey was conducted by the Yukon Bureau of Statistics and no one in the Government of Yukon other than designated YBS employees has access to respondents' individual responses. Responses are confidential and protected by the Statistics Act (SY 2003, c.27; amended by SY 2016, c.5).

All results are derived from an anonymized dataset and reported in aggregate form to protect respondents' confidentiality. Furthermore, the Yukon Bureau of Statistics has reviewed the report to ensure that no individual employee can be directly or indirectly identified from the results.
