

FOREST RESOURCES  
**TIMBER TRANSPORT APPLICATION**

**Before you apply**

- Pursuant to Section 52 of the *Forest Resources Regulation*, no person may transport timber on a highway in Yukon unless the timber is identified with a timber mark that has been issued to the permit holder. This does not apply to transporting 25 m<sup>3</sup> or less of fuel wood for personal use.
- Timber marks are a unique alpha numeric series used to identify the point of origin of harvested timber and that any potential forest health risks have been evaluated.
- A timber mark is needed for all commercially harvested timber, regardless of the origin or destination including timber that is being exported from Yukon or timber that is imported from outside Yukon.
- If you are harvesting timber for commercial purposes under a timber resources licence or a fuel wood licence, your cutting permit will specify your timber mark.
