Note to readers:

- All figures in this release are based on Statistics Canada's Labour Force Survey (LFS) estimates. Information gathered from LFS respondents is weighted to represent the survey target population using population calibration totals. These totals are updated each month, using the most recently available information on population changes derived from Canada's official population estimates, with minor adjustments being made to reflect the LFS target population.
- The Labour Force Survey (LFS) estimates in this release reflect labour market conditions during the reference week. This is usually the week containing the 15th day of the month.
- All estimates are rounded to the nearest hundred.
- All territories' monthly figures are based on three-month moving averages and are, therefore, not included in the overall figures for Canada.
