

# NEVER A GOOD MIX

Whether smoked or ingested, THC cannabis can seriously affect your ability to drive. This includes all motor vehicles including snowmobiles and ATVs.

THC impairs your:

- judgement
- reaction time
- visual function
- concentration
- ability to maintain proper following distance
- perception of speed
- ability to handle unexpected situations on the road

No one is a better driver when they're high.

## KNOW THE RISKS

- Driving under the influence of THC doubles your chance of a collision.
- Any amount of alcohol makes it even worse.
- If convicted you can face hefty fines and even jail time.

**TALK WITH YOUR  
PHARMACIST OR DOCTOR.**

**ARE YOU SAFE TO DRIVE?**
