

Yukon Communicable Disease Control
4 Hospital Rd, Whitehorse, Yukon Y1A 3H8

October 20, 2021

Dear Parents, guardians, students and staff,

This letter is to inform you that Yukon Communicable Disease Control (YCDC) has been made aware of a **positive case of COVID-19 at Elijah Smith Elementary School** affecting the:

- Grade K/1 Split Class, on Thursday, October 14th and Friday, October 15th 2021

Students and staff connected to the above class have been identified as close contacts of COVID-19.

A risk assessment has been completed by YCDC, in consultation with a Medical Officer of Health. After careful analysis, we recommend the following for students and staff connected to the above classes:

- **If you have received 2 doses of COVID-19 immunization, with the last dose prior to October 1th, 2021, and you are not significantly immunosuppressed due to illness or medication, we recommend you self-monitor for symptoms through October 29th inclusive.**
- **If you are partially-vaccinated (1 dose only) or unvaccinated, or are fully immunized but with significant immunosuppression, you are recommended to self-isolate for 10 days following exposure and then self monitor for 4 days.**
 - **Students in attendance October 14 only:** Isolate until October 24th inclusive, and then self-monitor for symptoms through October 28th
 - **Students in attendance October 15:** Isolate until October 25th inclusive, and then self-monitor for symptoms through October 29th

It is very important that if **any** symptoms develop, no matter how mild, that you arrange for testing. Symptoms to self-monitor for include:

- | | | |
|------------------------------|--|------------------------------|
| • Fever | • Sore throat | • Loss of appetite |
| • Chills | • Loss of sense of taste or smell | • Nausea and vomiting |
| • Cough | • Headache | • Diarrhea |
| • Shortness of breath | • Fatigue | • Muscle aches |
| • Runny nose | | |

Symptoms of COVID-19 may be mild or severe and often have a different presentation in persons who are very young or older persons. While most people will experience mild illness, older adults and people with pre-existing medical conditions are at higher risk for severe illness.

If you develop **any** symptoms, no matter how mild, contact **the COVID Testing and Assessment Centre (CTAC) in Whitehorse at 867-393-3083**. When calling CTAC, please mention that you are part of the Elijah Smith Elementary School notifications.

COVID-19 is a respiratory illness that is spread through droplets when a person coughs, speaks, or by touching surfaces contaminated by the virus with your hands and then touching your face before washing your hands.

If you are eligible for COVID-19 immunization and not yet fully immunized, please book your immunization after your isolation period has ended. For general information on COVID-19 see yukon.ca/en/covid-19-information
