

# Gonorrhoea cases are on the rise in the Yukon

**113** infections since Jan 1, 2024

Reported cases and rates of gonorrhoea in the Yukon, 2014-2024

Case counts and rates include all cases of gonorrhoea (genital and extra-genital). Data is current as of September 30, 2024. Projected case counts and rates assume that the average number of reported cases per month year to date (YTD) will remain constant throughout 2024.

So far in 2024, cases of Gonorrhoea have increased by **465%** since 2023

The Yukon is on track to exceed the previous 10-year record for number of gonorrhoea infections in a year.

So far in 2024, **51%** of cases are in men and **49%** are in women

The majority of those infected are between **20** and **39** years old

Cases have been reported in people ranging from 15 to 62 years of age

Are you positive you're negative?  
Don't guess, just test.
