

**Yukon Communicable Disease Control  
4 Hospital Rd, Whitehorse, Yukon Y1A 3H8**

December 23, 2021

To parents, guardians, and staff of Learning Tree Daycare,

In addition to the letter sent on December 20<sup>th</sup>, this letter is to inform you that Yukon Communicable Disease Control (YCDC) has been made aware of a positive case of COVID-19 at **Learning Tree Daycare at 95A Lewes Boulevard** in Whitehorse affecting the:

- Toddler Group on Wednesday December 15 & Monday December 20, 2021
- This only affects the toddler group

All children who attended this group on December 15 & 20, 2021 have been identified as close 'contacts' of COVID-19. YCDC has completed a careful risk assessment and the clinical care direction for children attending the above groups is:

- A. self-isolate until December 30, 2021 inclusive, and self-monitor for symptoms through January 3, 2022, if:
- contact is not fully immunized against COVID-19 (as described below in Section B).
- B. self-monitor for symptoms through January 3, 2022, if:
- contact is not significantly immunosuppressed due to illness or medication AND has received 2 doses of COVID-19 immunization, with the last dose prior to December 1, 2021.  
OR
  - contact is significantly immunosuppressed due to illness or medication AND has received 3 doses of COVID-19 immunization, with the last dose prior to December 1, 2021.  
OR
  - contact has been diagnosed with lab confirmed COVID-19 in the last 90 days.

It is very important that if any symptoms develop, no matter how mild, you do not go to work or daycare and arrange for testing. COVID-19 is a respiratory illness that is spread through droplets when a person coughs, speaks, or touches surfaces contaminated by the virus and then touches their face before washing their hands. Children in these age groups often have mild symptoms.

Symptoms to self-monitor for include:

- |                       |                                   |                       |
|-----------------------|-----------------------------------|-----------------------|
| • Fever               | • Sore throat                     | • Loss of appetite    |
| • Chills              | • Loss of sense of taste or smell | • Nausea and vomiting |
| • Cough               | • Headache                        | • Diarrhea            |
| • Shortness of breath | • Fatigue                         | • Muscle aches        |
| • Runny nose          |                                   |                       |

Symptoms of COVID-19 may be mild or severe and often have a different presentation in persons who are very young or older persons. While most people will experience mild illness, older adults and people with pre-

existing medical conditions are at higher risk for severe illness.

If you were to develop **any** symptoms, no matter how mild, contact the Covid Testing and Assessment Centre at 867-393-3083. When calling, please mention that you are part of the Learning Tree Daycare notifications.

If you are eligible for COVID-19 immunization and not yet fully immunized, please book your immunization after your isolation period has ended. For general information on COVID-19 see [yukon.ca/en/covid-19-information](https://yukon.ca/en/covid-19-information)
