1. The share of the total economy is calculated using income-based gross domestic product (GDP) at market prices adjusted for taxes less subsidies on products and imports.

2. Canadian territorial enclaves abroad. These include embassies, consulates, military bases, scientific stations, information or immigration offices, aid agency offices, and central bank representative offices with diplomatic immunity.

Note to Readers:

The Provincial and Territorial Culture Indicators (PTCI) were developed as an extension of the more comprehensive Provincial and Territorial Culture Satellite Account (CSA). The PTCI are a joint initiative of Statistics Canada, other federal agencies, all provincial and territorial governments, as well as non-governmental organizations.

All the GDP figures in this release are expressed in nominal, basic prices. Total economy GDP is calculated using income-based GDP at market prices adjusted for taxes less subsidies on products and imports.

Culture GDP is the economic value added associated with culture activities. This is the value added related to the production of culture goods and services across the economy, regardless of the producing industry.

Sport GDP is the economic value added associated with sport activities. This is the value added related to the production of sport goods and services across the economy regardless of the producing industry.
