

Population Projections 2021

Highlights:

- In 2021, Yukon's population is projected to be 40,130, 41,698 or 43,188 (based on three reference periods).
- All three of our projected population figures show Yukon experiencing growth over the next ten years.
- The Whitehorse population in 2021 is projected to be between 30,721 and 33,179.

Yukon Population Projections
Based on Three Reference Periods

Yukon population estimates have widespread use and importance. However, many policy-makers' and businesses' decisions ultimately rest upon assessments of future population size and growth trends. For this reason, the Yukon Bureau of Statistics produces ten-year population projections.

Population projections presented in this report have changed notably from previously published population projections. In the past, projections were based on three different scenarios: a high-growth, a low-growth, and a medium-growth scenario. In this publication, projections are calculated based on historically observed trends in a defined reference period. Three different population projections are presented—one that projects on recent trends (i.e. June 2009 to June 2011), through a mid-range historical basis (i.e. June 2006 to June 2011) to a longer-term reference period (i.e. June 2001 to June 2011).

In addition to providing projections based on historical reference periods, current calculations use a cohort component method of population projection. This involves taking into account births, deaths, and in- and out- migration by sex, age group, etc. for the defined reference period.

These projections do not account for any future changes in business or government projects which could affect Yukon's population. The projections are strictly based on the demographic patterns observed during the reference years. It is up to users to determine whether the economic conditions that have driven migration over the reference period will hold over the period for which the population projections are calculated.

Note that Yukon's population is more sensitive to migration compared with some of the larger Canadian provinces, and to Canada as a whole. Unlike birth and death rates, migration is driven by economic conditions, and is more volatile and less predictable than birth and death rates.

2021 Yukon Population by Age
Based on Three Reference Periods

Age Group	Reference Period*		
	2009-2011	2006-2011	2001-2011
00-04	2,138	2,192	1,991
05-09	2,101	2,125	2,040
10-14	2,112	2,014	1,966
15-19	1,957	1,823	1,782
20-24	2,152	2,063	1,842
25-29	2,913	2,997	2,478
30-34	3,594	3,769	3,242
35-39	3,747	3,895	3,503
40-44	3,248	3,370	3,094
45-49	2,951	3,111	2,918
50-54	2,759	3,008	2,803
55-59	2,939	3,195	3,015
60-64	2,920	3,116	2,990
65-69	2,395	2,554	2,492
70-74	1,743	1,832	1,833
75-79	981	1,032	1,045
80-84	518	560	564
85+	530	531	534
All Ages	41,698	43,188	40,130

*Reference period is June of given year

Projections Based on June 2009-2011 Reference Period

2011 and 2021 Population Pyramids

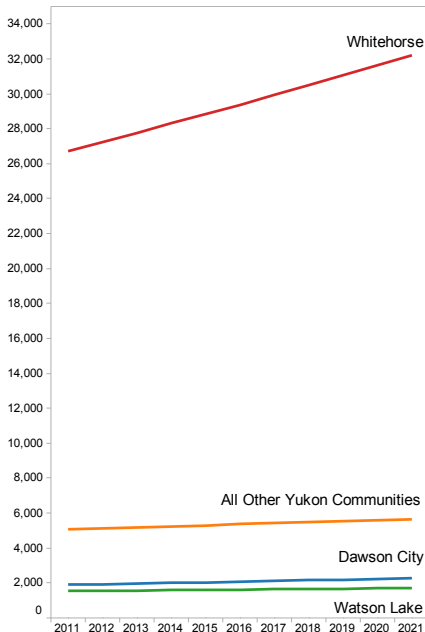

If population growth trends from June 2009 through June 2011 continue for the next ten years, Yukon's overall population will grow by 6,523, or 18.5%.

In 2011, 75.2% of the population was in the working-age group (between 15 and 64 years of age). In 2021, that percentage will drop to 70.0% as the baby boom generation reaches retirement age. Conversely, the senior citizen population (age 65+) will nearly double in number, while growing from 9.0% of the population to 14.8%.

The youth population (those under age 15) will hold relatively steady, increasing by 800 but remaining under 16% of the population.

- Population projections for individual communities are created by applying the components of Yukon-wide population growth to the June 2011 baseline population of each individual community.
- The 2021 population of Whitehorse (32,194) will increase by 20.5% while the rest of Yukon will grow by 12.3%.
- Growth will not be even in both genders. The male population, which currently comprises 50.9% of the population, will drop to 50.5% in 2021 while the female population will grow from 49.1% to 49.5% of the total population.
- The 2021 female Yukon population of 20,646 represents a growth of 19.6% over ten years, while the male population of 21,052 represents a 17.6% increase.

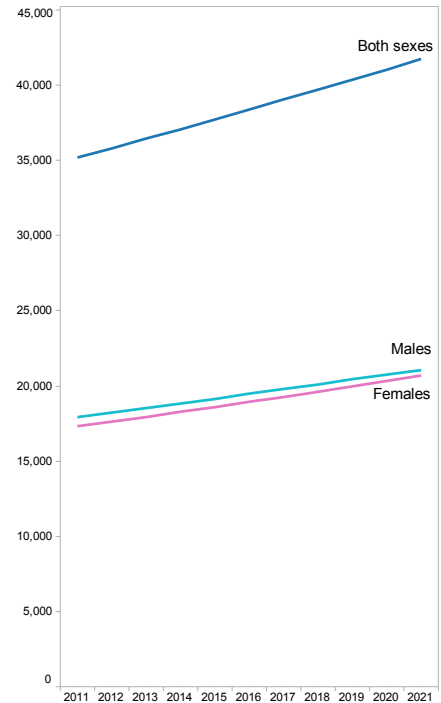

Population Through 2021 by Selected Community

Year	White horse	Dawson City	Watson Lake	All other communities
	2011	26,711	1,880	1,514
2012	27,222	1,914	1,530	5,120
2013	27,742	1,948	1,546	5,175
2014	28,270	1,983	1,563	5,227
2015	28,808	2,017	1,579	5,280
2016	29,355	2,052	1,596	5,334
2017	29,909	2,088	1,613	5,387
2018	30,470	2,123	1,629	5,440
2019	31,039	2,158	1,646	5,490

Projections Based on June 2006-2011 Reference Period

2011 and 2021 Population Pyramids

If population growth trends from June 2006 through June 2011 continue for the next ten years, Yukon's overall population will grow by 8,013, or 22.8%.

In 2011, 75.2% of the population was in the working-age group (between 15 and 64 years of age). In 2021, that percentage will drop to 70.3% as the baby boom generation reaches retirement age. Conversely, the senior citizen population (age 65+) will more than double in number, while growing from 9.0% of the population to 15.1%.

The youth population (those under age 15) will hold relatively steady, increasing by 780 but dropping from 15.8% to 14.7% of the population.

- Population projections for individual communities are created by applying the components of Yukon-wide population growth to the June 2011 baseline population of each individual community.
- The 2021 population of Whitehorse

(33,179) will increase by 24.2% while the rest of Yukon will grow by 18.3%.

- Growth will not be even in both genders. The male population, which currently comprises 50.9% of the population, will rise to 52.3% in 2021 while the female population

will drop from 49.1% to 47.7% of the total population.

- The 2021 female Yukon population of 20,590 represents a growth of 19.3% over ten years, while the male population of 22,597 represents a 26.2% increase.

Population Through 2021 by Selected Community

Year	White	Dawson	Watson	All
	horse	City	Lake	other communities
2011	26,711	1,880	1,514	5,068

Projections Based on June 2001-2011 Reference Period

2011 and 2021 Population Pyramids

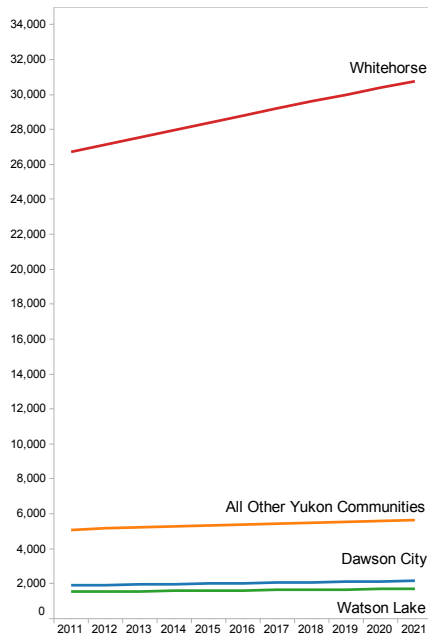

If population growth trends from June 2001 through June 2011 continue for the next ten years, Yukon's overall population will grow by 4,955, or 14.1%.

In 2011, 75.2% of the population was in the working-age group (between 15 and 64 years of age). In 2021, that percentage will drop to 68.9% as the baby boom generation reaches retirement age. Conversely, the senior citizen population (age 65+) will more than double in number, while growing from 9.0% of the population to 16.1%.

The youth population (those under age 15) will hold relatively steady, increasing by 446 but dropping from 15.8% to 14.9% of the population.
