* Question 17 has a relatively high (\geq 10%) proportion of "don't know/not applicable" responses.

States of engagement

Another way of understanding employees' experiences is by exploring their different states of engagement based on how they answered the four survey questions that measure the two characteristics in the roof of the house model (job satisfaction and organization commitment).

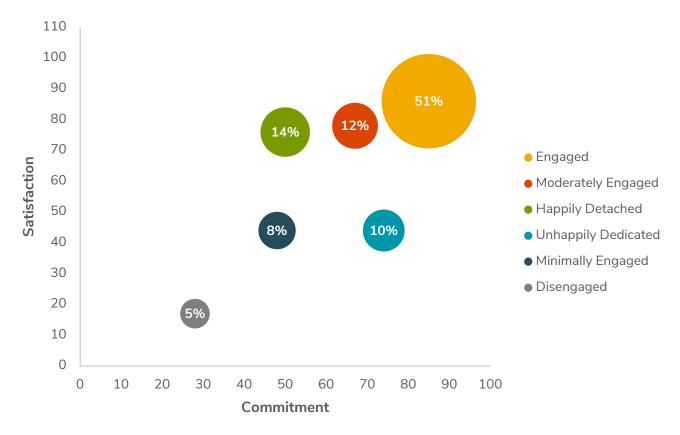

Generally, when employees are engaged, they are:

- satisfied with their job; and
- committed to their organization.

Employees' commitment and satisfaction scores tend to move in tandem. As satisfaction increases, their commitment tends to increase as well (higher engagement). As satisfaction diminishes, commitment likely also declines (lower engagement). By plotting employees' satisfaction scores against their commitment scores, we can see how employees cluster within different states.

For example, employees who are highly committed and highly satisfied (scores \geq 75 points) are considered to be engaged. Alternatively, employees who are highly committed (scores \geq 60 points), but are not satisfied (scores \leq 60 points), are considered to be unhappily dedicated.

The figure displays the proportion of respondents in Energy, Mines and Resources belonging to each of the six states graphically.

For more information visit: https://yukonnect.gov.yk.ca/employee-info/Pages/employeeengagement.aspx

This material is prepared for the Public Service Commission by the Yukon Bureau of Statistics.

Confidentiality: During the survey administration, employees received personalized invitations and reminders. The survey was conducted by the Yukon Bureau of Statistics and no one in the Government of Yukon other than designated YBS employees has access to respondents' individual responses. Responses are confidential and protected by the Statistics Act (SY 2003, c.27; amended by SY 2016, c.5).

All results are derived from an anonymized dataset and reported in aggregate form to protect respondents' confidentiality. Furthermore, the Yukon Bureau of Statistics has reviewed the report to ensure that no individual employee can be directly or indirectly identified from the results.
