

# COMMERCIAL AND INDUSTRIAL Land Application and Lot Enlargement Policy

## OBJECTIVE

To facilitate the provision of land for commercial and industrial purposes.

Applications for remote commercial uses (i.e. more than 1 km from a year round maintained road) will not be considered, except:

- When the land is to be used for a communication tower, wind power turbine/wind generation, wind testing equipment or public utility.
- When the application is for an enlargement to an existing titled commercial lot.

## PURPOSE

This policy provides direction regarding the review of applications for commercial and industrial uses. The purpose of the policy is to:

- Allow people to acquire Yukon (public) land or enlarge existing properties for commercial and industrial purposes.
- Ensure community interests are protected with respect to the management and disposition of Yukon (public) land.
- Meet development standards as defined in the *Subdivision Act and Regulations*, planning schemes (see Definitions), other regulatory authorities, and resource management plans and policies.

## BACKGROUND

Where the private sector and planned development does not satisfy all demand for commercial and industrial lands, the Land Management Branch makes land available in response to individual applications. Land Management Branch also develops planned commercial/industrial lots in most communities. These lots are sold by public tender. Prior to making application under this policy, applicants should contact the Land Management Branch, to determine if suitable lots are available.

## DEFINITIONS

The definitions below provide a general description of 'typical' commercial/industrial land use\ activities and are not meant to be all-inclusive. Applications are reviewed on a case-by-case basis to ensure compliance of the activity with the class of land use.

**Commercial:** Describes a use in connection with a trade, business, profession, manufacture or other venture for profit. Includes, but is not limited to stores, restaurants and highway tourism. Does not include bed and breakfast (for bed and breakfast, see the Rural Residential Land Application Policy).

**Communication Tower:** Means a tower or structure built to support equipment used to transmit communication signals.

**Cumulative Effects:** Changes of an environmental, social, or economic nature caused by the combination of past, existing, proposed, and reasonably foreseeable future development.

**Detailed Rationale:** Description of why the land applied for is required, including why that amount of land is needed. This must be accompanied by a map (to scale) of the site plan demonstrating how the land will be used. Applications for small amounts of adjacent land may in certain circumstances be exempt from this requirement (e.g. in cases of road realignments and easements etc.). Impact on access will be taken into consideration (e.g. people, wildlife, services etc. ability to access shoreline).

**Development Node:** A grouping of two or more land dispositions in relatively close proximity.

**Government of Yukon Reserve:** Identifies land to be set aside or retained from public disposition for a specific purpose (current or future).

**Grouping of Applications:** If more than one application (of any type) exists in an area and they have not yet received decisions, or if there are particular sensitivities in an area, applications may be grouped together in order to consider social, economic and environmental information and to ensure that consistent information is considered in each application.

**Lot enlargement:** Includes the consolidation of a vacant or surveyed lot with an adjacent titled lot. This will require subdivision approval from the relevant authority (Municipal, Government of Yukon) and must conform to the Principles and Parameters set within this policy.

**Industrial:** Describes a light or heavy use related to construction, forestry, mining, commercial fishing, agriculture, quarrying transportation or other industrial activity. Includes but is not limited to storage yards, processing facilities, machine shops, factories, warehouses and terminals.

**Non-compliant with Policy:** An application that is determined not to meet the policy criteria during the Policy Compliance Review stage (prior to review by the Land Review Committee). The application is deemed ineligible and Land Management Branch is unable to proceed further with it.

**Planning Scheme:** A regional plan, sub-regional plan, district plan, community plan, local area plan; or land use policies and regulations made under the *Area Development Act*, the *Highways Act*, the *Lands Act* or the *Territorial Lands (Yukon) Act*. Also includes Special Management Area plans created to fulfill obligations under the appropriate First Nation Final Agreement, Habitat Protection Areas under the *Wildlife Act*, and Parks under the *Parks and Land Certainty Act*.

**Pre-planning Process:** A process coordinated by the Land Management Branch, Government of Yukon to assess an area for its suitability for development, which may involve input from the departments of Environment, Highways and Public Works, and Community Services, and any other department with responsibilities or interests in the area. It may consider social, economic, and environmental information in areas that have no planning scheme and that are experiencing heightened interest, such as where multiple applications are received; multiple sensitivities identified through a land application review; where planning is occurring or anticipated; or where consultation with other governments, such as First Nations, is advisable. A pre-planning process may result in the Land Management Branch closing off an area to applications or deferring or denying applications pending more comprehensive review.

**Proposed Planning Scheme:** A local area plan or a regulation under the *Area Development Act* that has undergone a final consultation and that has been submitted to EMR for consideration and has been formally

acknowledged to be a Proposed Planning Scheme by the Department of Energy, Mines and Resources.

**Public Utility:** A business or service which is engaged in regularly supplying the public with some commodity or service which is of public consequence and need, such as electricity, gas, water or telephone service.

**Wind Power Turbine/Wind Turbine Generator:** Electricity generating machines which consist of a generator housing (nacelle) and wind bladed rotor situated on top of a freestanding tubular steel, lattice or concrete tower.

**Yukon (public) Land:** Includes both territorial lands as defined in the *Territorial Lands (Yukon) Act* and “Yukon lands” as defined in the *Lands Act*.

#### **ABBREVIATIONS**

IRM - Integrated Resource Management

OHWM - Ordinary High Water Mark

YESAA - Yukon Environmental and Socio-Economic Act

## PRINCIPLES

- A. Land tenures must comply with existing and proposed planning schemes (see Definitions).
- B. Land tenures are only authorized in an amount reasonably necessary to satisfy the purpose for which the land is needed.
- C. Land applications in rural areas may be directed to developed Development Nodes to provide for the rational delivery of services and to minimize the impact on other resource users and the environment. In areas with planned development, this would include areas designated for further commercial or industrial development.
- D. Land required to facilitate public recreation and multiple use of land and natural resources will normally be retained for public use rather than alienated for private use.
- E. During the application review process, the Land Management Branch will, whenever possible, consider the principles of Integrated Resource Management (IRM) in finalizing a decision. Core IRM principles include fostering understanding, cooperation and communication with other departments, governments and agencies involved in resource management, in order to consider and weigh all values before finalizing a decision.

## POLICY PARAMETERS

### ***A. Form of Tenure***

1. Tenure may be provided under a licence, lease or three-year agreement for sale.
2. Terms of a lease or licence may vary depending on the nature of activities.
3. All applicants are required to submit a business plan. The business plan shall form part of the tenure agreement.
4. The following development conditions apply to the three-year agreement for sale:
  - Building commitment criteria is not a mandatory requirement. However, Land Management Branch reserves the right to set this as a condition in certain circumstances.

- Development is to meet existing and proposed planning schemes and other regulatory requirements.
- Development is to meet the requirements of the *Building Standards Act* and *Regulations*.
- For lot enlargements, legal survey by a Canada Lands Surveyor is to be registered by the applicant within 1 year of entering into the agreement for sale. Subdivision approval is required prior to survey.
- Title (for sales) is provided when development conditions and all other terms and conditions of the agreement for sale have been met, the survey is registered and full purchase price paid. For applications for new parcels of land (not lot enlargements) Land Management Branch will survey the site and register the survey plan. For a lot enlargement application, survey is registered by the applicant.
- Quarry leases are issued for five years, but may be renewed for one or more further terms of five years at the discretion of the Land Management Branch Director. Terms and conditions are subject to requirements of the *Quarry Regulations*.

## **B. Cost of Land**

1. Annual lease and licence fees are minimum 10% of market value.
2. Annual quarry lease fees are 5% of market value (per *Lands Act*, *Quarry Regulations*).
3. If land is sold it will be at market value.
4. A market value appraisal is required as a condition of sale. The applicant may be required to incur the cost of the appraisal.
5. All development costs are the responsibility of the applicant, this includes survey costs.

### **C. Area of Tenure**

1. Lot sizes will conform to the *Subdivision Act and Regulation* and existing and proposed planning schemes.
2. Land will be provided as reasonably required to carry out approved activities.

### **D. Site Criteria**

#### **1. Applications under this policy may be considered if they:**

- Are suitable for their intended purpose. Applicants should reference the evaluation criteria outlined in the *Subdivision Regulations, Section 8*. (See: Appendix C of this policy).
- Comply with existing and proposed planning schemes:
  - Local area plans (where they exist) are the primary screen for the review of applications.
  - Applications will not be considered in areas designated in a local area plan or zoning regulation for Future Development.

**Note:** Lot enlargement applications located within an area that is undergoing a local area planning process, or where a local area planning process is imminent will be considered.

See Land Planning Branch website for details of these areas: [www.emr.gov.yk.ca/lands/local\\_area\\_plans.html](http://www.emr.gov.yk.ca/lands/local_area_plans.html) or contact Land Planning Branch for more information at (867) 456 3827 or Toll free at 1 800 661 0408 ext. 3827.

- Road Accessibility:
  - Are accessible by land directly off a highway maintained on a year-round basis (within 1 kilometre, including un-serviced connecting roads). Highways receiving year-round maintenance are listed in Schedule 1 Maintained Highways, *Highways Regulations* (See Appendix A); or
  - Are located on secondary roads intersecting with maintained highways (within 1 kilometre of intersection) where nodal development may be appropriate or already existing.

- Where an application requires access across private land a letter of permission is required from the land owner.

**Note:** The road accessibility requirement does not apply when:

- The land is to be used for a communication tower, wind power turbine/wind generation or wind testing equipment or public utility.
  - The application is for an enlargement to an existing titled commercial lot.
- Are located in areas identified for commercial/industrial purposes through preliminary screening processes (see Definitions).
  - Are not located in areas identified in Section 7, below.
2. Applications located directly off the Alaska and Klondike Highways are considered on a case-by-case basis, but are normally directed to existing Development Nodes,
  3. Applications requiring a new highway access road will be subject to approval of access permit by the Department of Highways and Public Works. These applications will also be considered according to the provisions of the *Yukon Environmental and Socio-Economic Act* (YESAA) and regulations to determine whether an environmental assessment will be required.
  4. Land management factors, such as the ability to extend the road to service additional commercial / industrial lots, and so facilitate nodal development, will be considered in the review of applications.
  5. The interests of adjacent land owners will be considered in the review of any application that restricts the enlargement capability of adjacent lots.
  6. Road, lake or river frontage shall not generally be more than 25% of the overall parcel boundary.

**7. Applications under this policy will not be considered if they:**

- Propose to access from a highway that is not maintained on a year-round basis (*i.e.* highways that do not receive year round maintenance in Schedule 1 of the *Highways Regulations*. See Appendix A: Maintained Highways).
  - Exceptions are listed in Section D1 Site Criteria - Road Accessibility.
- Are located within an area that is undergoing a local area planning process. Note: Applications for lot enlargements or Licences of Occupation are permitted.

Areas undergoing a local planning process include:

- Alaska Highway West /Dezadeash
- Fox Lake
- Marsh Lake
- Tagish

See Land Planning Branch website for details:

[www.emr.gov.yk.ca/landplanning/local-area-plans.html](http://www.emr.gov.yk.ca/landplanning/local-area-plans.html)

- Are located in areas identified as exclusion zones - *e.g.* key habitat areas, identified through preliminary screening processes.
- Encroach on highway rights-of-way and other public infrastructure corridors.
- Overlap with a Yukon Government Reserve, except with consent from Land Management Branch.
  - For information related to Administrative Reserves see the Administrative Reserves and Notations policy:  
[www.emr.gov.yk.ca/lands/legislation\\_policies.html](http://www.emr.gov.yk.ca/lands/legislation_policies.html)
- Are located on the Aishihik Lake Road (lot enlargements and licences will be considered).
- Are located on the Haines Road (lot enlargements and licences will be considered).

- Are on lands unsuitable for commercial/industrial purposes- e.g. on slopes exceeding 15% or in sub-alpine or alpine areas.
8. Consideration of applications within municipalities is subject to municipal direction as per the *Official Community Plan* and zoning criteria.
  9. Applications that propose to change or enlarge an existing land use will be reviewed in light of compatible land use principles and may require a specific zoning regulation and/or more comprehensive consultation to legitimize proposed use of the enlargement area.

#### **F. Resource Management Criteria**

1. Parcels will normally be set back a minimum of 60 metres from the ordinary high water mark (OHWM) of lakes and rivers, and a minimum of 10 metres from creeks.
  - The setback may be increased where a greater setback is required due to environmental, cultural or scenic values, or to facilitate other land uses or management considerations.
  - The setback may be decreased to as little as 30.48 metres where the additional reserve is not required to address the interests of existing or potential public recreation or other resource users, and is not required for environmental protection purposes.
2. Unique or representative landscape features, environmentally sensitive areas, shorelines and archaeological sites are normally retained for public use rather than alienated for private use.
3. Sites that accommodate public access to and use of land or water resources are normally retained for public use rather than alienated for private use.
4. Applications under this policy will comply with existing and proposed planning schemes and resource management plans- e.g. forestry, wildlife where applicable.
5. Applications are reviewed to ensure that the needs of other public and commercial resource users are considered in an equitable manner.

6. Consideration will be given to the need for spatial separation between commercial / industrial applications and other land and resource users to facilitate integrated resource management and avoid land use conflicts.

#### **ELIGIBILITY**

- Corporations, partnerships *etc.* registered with Corporate Affairs, Department of Community Services and in good standing.
- An individual 19 years or older.
- If applying for an enlargement to an existing property, the applicant must be the registered owner of the property proposed for enlargement.

#### **APPLICATION REQUIREMENTS**

Applications must be complete.

All applications must include the following (see application form for further details):

- Completed application form (applicants are required to submit a draft application in order to ensure completeness and boundary coordinates, and compliance with Land Management Branch policies).
- Where the land is within a municipality: Notification by letter from the municipality (Manager of Planning/Subdivision and Lands Coordinator/Chief Administrative Officer) stating the application complies with applicable Official Community Plans, local planning schemes and zoning. The notification should identify existing zoning.
- Detailed site sketch, which includes a consistent and defined proportional drawing of the site (i.e. a scaled drawing).
- Coordinates of the application area..
- Application fee (see application form for details).
- Subdivision fee (if applicable, see application form for details). Applications for Yukon land in Dawson and Whitehorse must pay the subdivision fee directly to the municipality after the land application is conditionally approved.
- Copy of Business License.
- Operation and Rehabilitation Plan (for Quarry Applications).
- All applications must be accompanied by a business plan.  
For further details see the Business Plan Guideline:  
[www.emr.gov.yk.ca/lands/legislation\\_policies.html](http://www.emr.gov.yk.ca/lands/legislation_policies.html)
- Must have a business registered in Yukon and be in good standing.

- Applications for land to be used for communication towers, within municipal boundaries, must include a letter of support from the manager or CAO in the applicable municipality.

Applications for lot enlargements shall also include:

- Copy of Certificate of Title of the proposed lot to be enlarged.
- Copy of any caveats or encumbrances registered against the title.
- Verification from Property and Taxation authority that all taxes have been paid on titled parcel.

## **APPLICATION REVIEW PROCEDURES**

1. Applications and attached Business Plans for commercial or industrial purposes will be reviewed as required under the *Yukon Environmental and Socio-economic Assessment Act (YESAA)* and Regulations or under the Yukon government land review process.
  - The Yukon government land application review process is outlined in the document “Guide to the Land Application Process.”:

[www.emr.gov.yk.ca/lands/legislation\\_policies.html](http://www.emr.gov.yk.ca/lands/legislation_policies.html)

2. Applications within municipalities require written acknowledgement from the municipality that the application may proceed to public review.
3. An application review may result in an approval, a conditional approval, a denial, or a deferral pending more information. Applications may be denied during the Policy Compliance Review Stage, if they are determined to be “Non-compliant with Policy” (See definition). Such applications will not be allowed to proceed.
4. If development pressures are experienced in an area, the Yukon government may choose to:
  - conduct a pre-planning process (see definitions);
  - group applications (see definitions) to consider the cumulative effects of multiple applications;
  - learn the outcomes of a planning process already underway; or
  - initiate a neighbourhood plan or similar plan.

Any of the above actions may result in a decision not to accept applications in an area, which will be communicated by a public

means as well as to the applicant in writing. For applications that have already been reviewed through the public review process, the above process may also result in the deferral or denial of an application.

All current Land Applications can be viewed on EMR's website:

[www.emr.gov.yk.ca/lands/land\\_applications.html](http://www.emr.gov.yk.ca/lands/land_applications.html)

**APPENDIX B: Section 8, Subdivision Regulations: Application Evaluation Criteria**

In making the decision required by paragraph 7(c), the approving officer shall consider comments submitted pursuant to paragraph 7(b) and the suitability of the land having regard to:

- a) its topography;
- b) its soil characteristics;
- c) its surface and subsurface drainage;
- d) any potential hazards such as flooding, erosion, subsistence, landslides, wildland fires, avalanches, or similar risks;
- e) quality of the water and availability and adequate supply;
- f) availability and adequacy of sewage disposal system and solid waste disposal;
- g) existing and prospective uses of the land proposed for subdivision and land in the vicinity;
- h) provision for and number of existing and proposed accesses to a highway;
- i) layout and lighting of roads and accesses from lots to roads;
- j) design and orientation of the subdivision including the size and shape of each lot;
- k) anticipated need for school sites, recreational facilities and parks;
- l) protection of sensitive environmental areas and critical fish and wildlife habitat;
- m) protection of significant natural, historical and heritage features;
- n) protection against pollution and other environmental and public health risks;
- o) the completed development checklist; and
- p) compliance with applicable planning scheme.
