The Yukon Rent Survey is a Yukon Bureau of Statistics (YBS) survey that has historically been conducted in the third month of every quarter (March, June, September and December) in Whitehorse, Watson Lake, Haines Junction and Dawson City. Beginning in 2014, the survey is being conducted on a semi-annual basis in April and October. In addition to the change in frequency, the survey methodology has been updated and the survey universe has been expanded to cover all types of buildings with rental units (single detached houses, townhouses/ row houses, duplexes, triplexes and fourplexes, condominiums, apartment buildings, store-top (commercial), mobile homes, cabins and garden suites). Subsidized or government-owned housing, and informal or illegal units remain excluded from the survey.

Despite the change in methodology, YBS will continue to generate median rent and vacancy rates for units in buildings with 3 or more rental units using comparable methodology to maintain the time series for historical comparisons. Pages 2 to 4 of this report include estimates based on the new methodology, while the analysis on the first page refers to buildings with 3 or more rental units. The graph below displays historical trends<sup>1</sup> of median rent and vacancy rates in Whitehorse.

For units in buildings with 3 or more rental units, the median rent in April 2022 (\$1,150) increased by \$79 compared to a year earlier (April 2021) and increased by \$50 compared to the previous reporting period (October 2021).

The vacancy rate remained almost stable (around 1.5%) between March 2011 and April 2013, started increasing to reach 4.7% in April 2014, (the highest rate since 2004), and then fluctuated within a range of 2.0% to 3.7% until April 2020. From October 2022, the vacancy rate started decreasing.

The vacancy rate in April 2022 (0.8%) was 1.3 percentage points lower than the rate in April 2021 (2.1%), and 1.1 percentage points lower compared to the rate in October 2021 (1.9%).
