

YUKON REPORTABLE DISEASES

Reportable by Fastest Means Possible ^{1,2}		Reportable by Routine Processes ^{1,3}		
Anthrax	Severe acute respiratory infection (SARI)	Acute flaccid paralysis	Cytomegalovirus (congenital infection)	Invasive pneumococcal (Streptococcus pneumoniae) disease ⁴
Botulism		Amoebiasis		
COVID-19	Severe acute respiratory syndrome (SARS)	Arboviral Infections, including:	Encephalitis/meningitis (bacterial; parasitic; viral)	Invasive group B streptococcal (Streptococcus agalactiae) infection ⁴
Diphtheria		Chikungunya virus		
Gastroenteritis (acute diarrheal)/ Enteric outbreaks all causes	Smallpox ⁵	Dengue Fever	Giardiasis	Leprosy
Hepatitis A	Tuberculosis (including all AFB positive smear results)	Flavivirus (other)	Gonorrhoea (all sites)	Listeriosis
Invasive group A streptococcal (Streptococcus pyogenes) infection ⁴	Typhoid	West Nile Virus	Hantavirus Pulmonary Syndrome	Lyme disease
Invasive Haemophilus influenza disease (Haemophilus influenza) ⁴	Verotoxigenic E. coli (e.g. O157:H7) enteric disease	Yellow Fever	Hepatitis B (acute, chronic & unspecified)	Malaria
Invasive meningococcal disease (Neisseria meningitidis) infection ⁴	Viral Haemorrhagic Fevers, including:	Zika	Hepatitis C (acute, chronic & unspecified)	Paratyphoid
Measles	Ebola Haemorrhagic Fever	Brucellosis	Hepatitis E	Pertussis
Monkeypox	Lassa Fever	Campylobacteriosis	Hepatitis, other viral	Plague
Mumps	Marburg Haemorrhagic Fever	Chancroid	Herpes simplex (congenital/neonatal infection)	Respiratory syncytial virus (RSV)
Poliomyelitis	Rift Valley Viral Haemorrhagic Fever	Chlamydia infection (all sites)	Human immunodeficiency virus (HIV)	Rubella
Rabies	Any infectious agent potentially transmitted through blood	Cholera	Influenza (all human & avian strains) notify by fastest means possible if possible outbreak	Salmonellosis
Rare or Emerging Communicable Disease (including unusual manifestation of a disease thought to be caused by a communicable disease)	transfusion, or transplantation of cells, tissues and organs ⁶	Clostridium difficile associated diarrhea (CDAD)		Shigellosis
		Creutzfeldt-Jakob disease (CJD) and variant Creutzfeldt-Jakob disease (vCJD) ⁷		Syphilis
		Cryptosporidiosis		Tetanus
		Cyclosporiasis		Trichinosis
				Tularemia
				Yersiniosis

¹ Lab: confirmed cases should be reported to YCDC / CMOH and ordering provider simultaneously. Providers: report possible, probable and suspicious cases when urgent public health follow-up is recommended.

² Phone call to YCDC (business hours) or MOH on call (weekends/afterhours) in addition to fax, electronic lab messaging.

³ Fax or electronic lab messaging.

⁴ Invasive/severe invasive as defined in the corresponding [Yukon Communicable Disease Guideline](#) in addition to use of the Minnesota Dept. of Health [Normally Sterile Sites: Invasive Bacterial Diseases](#) list.

⁵ Smallpox has been officially eradicated globally but remains listed in the event of possible bioterrorism acts.

⁶ This is a new category of reportable disease to cover any emerging pathogens that could be transmitted by these means.

⁷ This prion disease remains rare in Canada (incidence about 1 per million populations). Since diagnosis can only be confirmed by brain biopsy or necropsy, all CJD-like disease should be reported at the first suspicion of illness to facilitate further investigation of etiology.

Yukon Communicable Disease Control
 # 4 Hospital Road
 Whitehorse, Yukon, Y1A 3H8
