INTRODUCTION

OVERVIEW

This catalogue includes a listing of posters, broadsides, original art and miscellaneous items that have been acquired by the Yukon Archives. Posters include promotional materials, bills, broadsides and placards. The original art collection includes paintings, drawings, engravings, etchings, lithographs, and woodcuts. Miscellaneous objects include three-dimensional objects such as buttons, ribbons, badges, tags, stickers, and puzzles. All the material relates to the Yukon and dates from 1828 to the present. Much of the material advertises events and activities. There are over 500 posters, 50 miscellaneous objects, and 50 original art items.

The descriptions in the catalogue are organized by type: Miscellaneous Items, Original Art, and Posters. Within each category, the descriptions are filed according to their location codes. The location code is located in the right hand corner. The first letter of the location code indicates the type of material: O = Original Art, M = Miscellaneous Item, and P = Poster.

e.g. O-56
P-434
M-32

The location code is required to have the item retrieved.

Many of the items have been acquired as single, independent items. In some instances, an item may be part of a collection or fonds. In such cases, the provenance or collection name is given in the description. To view the related material, please see the fonds or collection description filed in the Reference Room.

SUBJECT INDEX

The descriptions have been subject indexed according to the topics or names that relate to the item. Many of the items have two subject headings, usually a specific heading and more general heading. The subject index lists all of the headings and the location code of the description that pertains to that heading. Refer to the appropriate section to find the item in question.

TITLE INDEX

The title index allows access to the material based on the title of the description. The titles have been sorted alphabetically, and are followed by the location code. Refer to the appropriate section to find the item in question.

RETRIEVAL OF ITEMS FOUND IN THE CATALOGUE

All of the materials in the catalogue can be viewed by filling out a retrieval slip and submitting it to the Reference Staff member at the front desk. Indicate on the retrieval slip the location code of the item that is desired.

MISCELLANEOUS ITEMS
