

Yukon Employment June 2021

Highlights

- In June 2021, Yukon's labour force was 23,500, the number of employed was 21,800, the number of unemployed was 1,600 and the unemployment rate was 6.8%.
- In February 2020, prior to the impact of COVID-19 on business sector industries, Yukon's labour force was 23,800, the number of employed was 22,900, the number of unemployed was 1,000.
- In June 2021, many Yukoners, who did not look for work, presumably due to the COVID-19 impact, were not counted as unemployed resulting in a decrease in the participation rate (labour force to population ratio) compared to January and February of 2020. **When the unemployment rate is adjusted to reflect this decrease in the participation rate, Yukon's June unemployment rate would be 9.9%; for Canada, it would be 10.1% (see the note on page 8).**

June 2021

Yukon Employment at a Glance:

Labour Force.....	23,500
Employed.....	21,800
Unemployed.....	1,600
Unemployment Rate...	6.8%
Employment Rate.....	66.9%

Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components may not add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Comparisons with Canada, Provinces and Territories - Snapshot

The participation rate measures the percentage of the population aged 15 years and over, which is working or actively looking for work. In June 2021, Yukon's participation rate (72.1%) was the second-highest in Canada, followed by the Northwest Territories (73.2%). Note: **This participation rate does not account for the decrease in labour force due to COVID-19.**

Yukon's June 2021 employment rate (the percentage of the population aged 15 years and over, which is employed), was 66.9%, the second-highest in Canada, following the Northwest Territories (69.9%).

Comparisons with Canada and Selected Provinces - Historical

The Labour Force Survey estimates that 72.1% of Yukoners aged 15 years and over were employed or seeking employment in June 2021.

Yukon's participation rate in June 2021 (72.1%) decreased by 0.8 percentage points compared to May 2021 (72.9%) and increased by 2.2 percentage points compared to the rate in June 2020 (69.9%).

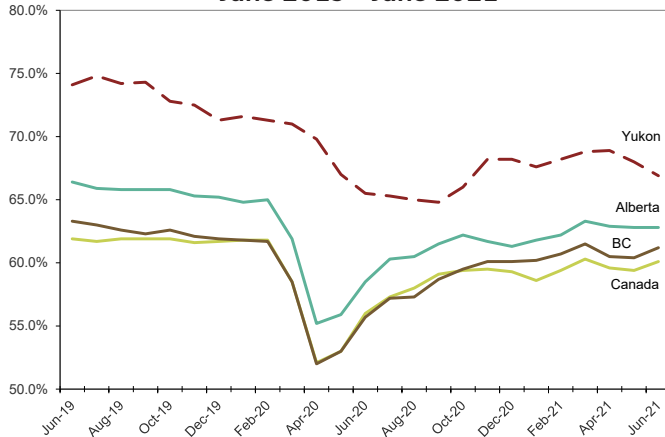

The June 2021 employment rate of 66.9% decreased by 1.1 percentage points compared to May 2021 (68.0%) and increased by 1.4 percentage points compared to June 2020 (65.5%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. **However, Alberta's monthly data show the shock due to COVID-19, which is not pronounced as much in Yukon's 3-month moving averages.**

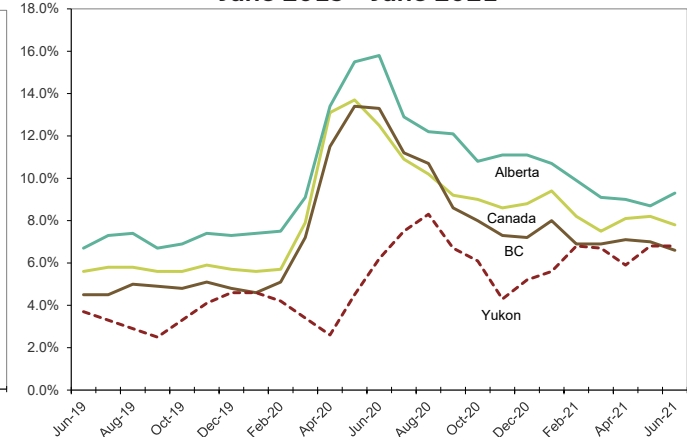

Participation Rate, June 2019 - June 2021

Employment Rate, June 2019 - June 2021

Unemployment Rate, June 2019 - June 2021

Unemployment Rate, 25+, Males and Females, June 2019 - June 2021

x = suppressed

Note: Data may not add up to the totals due to rounding.

Labour Force, *Unadjusted* and Annual, aged 15+ years, Yukon

Highlights:

- Compared to May 2021, full-time employment in June 2021 increased by 100 to 18,300; part-time employment remained the same at 3,700. **These changes do not account for the decrease in participation rate due to COVID-19.**
- In June 2021, employment in the goods-producing sector (3,100) increased by 100 compared to May 2021. Employment in the services-producing sector (18,900) increased by 100.
- Of all those employed in June 2021: 43.6% were public sector employees (see note on page 7); 39.1% were private sector employees; and 17.3% were self-employed.

Employment by Age and Sex, June 2019 - June 2021

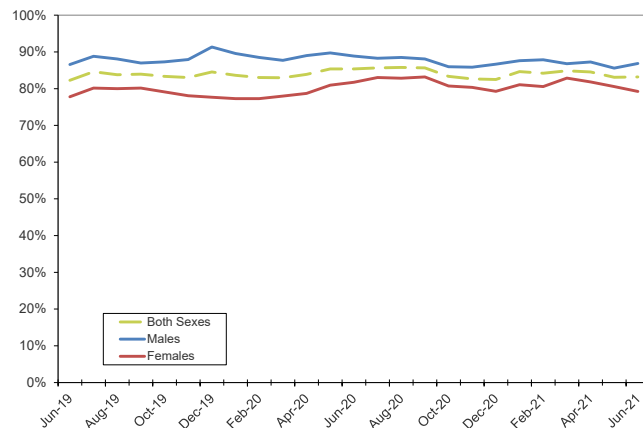

Unemployment Rate by Age and Sex, June 2019 - June 2021

- Comparing June 2021 to May 2021, the unemployment rate for males aged 15 years and over decreased from 7.5% to 6.6%, and the rate for males aged 25 years and over decreased from 6.5% to 5.6%. Over the same period, the rate for females aged 15 years and over increased from 7.7% to 7.8%, and the rate for females aged 25 years and over, increased from 5.8% to 6.9%. **These unemployment rates do not account for the decrease in the participation rate due to COVID-19.**
- The unemployment rate for Yukon's youth (aged 15-24 years) decreased from 16.0% in May 2021 to 13.3% in June 2021.

Employment, Unadjusted, by Full-time/Part-time, June 2021

Full-time employment as a percentage of all employment, June 2019 - June 2021

- Of employed Yukoners aged 15 years and over, 18,300, or 83.2%, were employed full-time in June 2021. Yukon had the sixth-highest proportion of full-time employment among provinces and territories. Nationally, 81.9% of employed Canadians worked full-time in June 2021.
- Of employed Yukon males, 86.8% worked full-time, compared to 79.2% of employed Yukon females.
- Comparing June 2021 to May 2021, full-time employment increased by 100 to 18,300. Part-time employment remained the same at 3,700.

Employment, *Unadjusted*, by Industry, June 2021

	Both sexes	Males	Females
Total employed	22,000	11,400	10,700
Goods-producing sector	3,100	2,700	500
Construction	1,800	1,600	x
Manufacturing	600	300	300
Services-producing sector	18,900	8,700	10,200
Trade	2,800	1,600	1,100
Transportation and warehousing	800	700	x
Finance, insurance, real estate and leasing	500	300	200
Professional, scientific and technical services	1,100	600	500
Business, building and other support services	500	400	x
Educational services	1,700	600	1,100
Health care and social assistance	3,500	800	2,700
Information, culture and recreation	900	600	400
Accommodation and food services	1,700	900	800
Other services	900	300	600
Public administration	4,600	2,000	2,500

x = suppressed Note: Data may not add up to the totals due to rounding.

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding. 'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

Goods- and Services-Producing Sectors, June 2019 - June 2021

- In June 2021, 18,900, or 85.9% of working Yukoners were employed in the services-producing sector, while 3,100, or 14.1%, were employed in the goods-producing sector.
- Of Yukoners working in the goods-producing sector, 58.1% had jobs in the construction industry.
- While females accounted for 54.0% of workers in Yukon's services-producing sector, only 15.6% of the goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

- Employment in Yukon's goods-producing sector peaked in July 2019 with 4,700 workers. Employment in the services-producing sector reached a record-high level (20,300) in July through September 2017.
- Comparing June 2021 to May 2021, employment in the goods-producing sector increased by 100 to 3,100 and employment in the services-producing sector increased by 100 to 18,900.

Public and Private Sectors, *Unadjusted*, June 2021

	Both sexes	Males	Females
Total employed	22,000	11,400	10,700
Public sector employees	9,600	4,000	5,500
Total private sector	12,400	7,300	5,100
Private sector employees	8,600	5,100	3,500
Self-employed	3,800	2,200	1,600

Note: Data may not add up to the totals due to rounding.

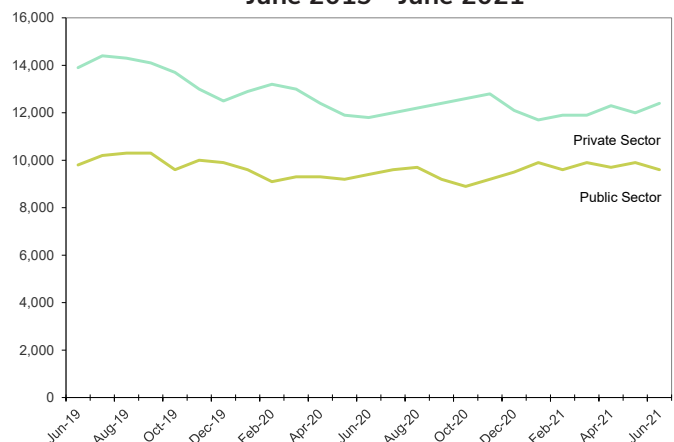

- In June 2021, 43.6% of working Yukoners were employed by one of the four levels of government in the territory.
- In the private sector, 30.6% were self-employed.
- Comparing June 2021 to May 2021, private sector employment increased by 400 to 12,400 and public sector employment decreased by 300 to 9,600.

Notes: 'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Public/Private Sector Employment, June 2019 - June 2021

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated.

Note: Labour Force Survey (LFS) data for the territories are three-month moving averages based on the information collected for the third week of each month. Statistics Canada excludes respondents who reported being laid off but not looking for jobs — understandably due to the pandemic-related business closures — from the labour force and does not count them as unemployed.

Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
