Nunavut	\$ 76,900	\$ 77,650	\$103,260	\$107,200	\$ 39,840	\$ 38,640

¹ Total income is income from all sources.

² Median is the middle number in a group of numbers. Where a median income, for example, is given as \$26,000, it means that exactly half of the incomes reported are greater than or equal to \$26,000, and that the other half is less than or equal to the median amount.

Note: Families are comprised of: 1) couples (married or common-law, including same-sex couples) living in the same dwelling with or without children, and 2) single parents (male or female) living with one or more children. Persons who are not matched to a family become persons not in census families.
