

Population Report Second Quarter, 2022

Highlights:

- The estimated population of Yukon on June 30, 2022 was 43,964; an increase of 774, or 1.8%, compared to the revised figure for June 30, 2021 (43,190).
- Comparing June 30, 2022 to June 30, 2012, Yukon's population increased by 7,681, or 21.2%. The population of the Whitehorse area increased by 6,719, or 24.0%; Dawson City increased by 351, or 17.7%; and Watson Lake increased by 4, or 0.3%.

Notes on methodology:

Official population counts prior to June 2010 were based on information in Yukon Health Care Insurance Plan (YHCIP) files and a semi-annual health care update survey that estimated the number of plan members who were no longer Yukon residents. In 2010, the estimation model was revised and the population counts for June 2010 through December 2014 were derived by tracking changes in YHCIP files and other administrative data files. In 2015, the model was further revised to make the approach more comprehensive and to improve accuracy based on information in all available and applicable administrative data files of the Yukon government. In addition, the total population count of April 2011 was calibrated to a census-based estimate adjusted for net undercoverage.

In 2020, the model was updated by prioritizing residential addresses over mailing addresses in the assignment of communities. This update allowed for separate reporting of population estimates for Johnson's Crossing and Mendenhall, and changes in the organization of Whitehorse subdivisions. The changes have been applied to all population estimates from June 2019 onwards.

Changes in community and subdivision populations from one time period to another are not only due to natural population change and migrations, but may also be due to the reassignment of residential addresses as additional administrative data become available.

All monthly estimates are as of the last day of the month. The June estimates represent annual figures.

Given that the number of non-binary individuals in Yukon's administrative files is very small, non-binary individuals are distributed between males and females to protect confidentiality.

Monthly Population, June 30, 2002 to June 30, 2022

- From 2004 through 2014, Yukon's population increased almost steadily in most quarters of every year except in 2013. Positive growth rates — often very high — have been recorded in each quarter, from 2015 onwards. The June 30, 2022 population at 43,964 is the new record-high¹ for Yukon.
- On June 30, 2022, Yukon's population (43,964), increased by 216 people, or 0.5%, from the revised figure for March 31, 2022 (43,748), and increased by 774 people, or 1.8%, from June 30, 2021 (43,190, revised).

¹ Accurate population counts during the Gold Rush are not available. However, the population figure in the first Census for Yukon (1901) was 27,219.

Population by Subdivision in Whitehorse Area

Note:
Subdivisions are assigned based on boundaries provided by the City of Whitehorse. Areas outside of the City of Whitehorse boundaries are assigned using Statistics Canada's Census Subdivision (CSD) boundaries within the Census Agglomeration of Whitehorse. Changes in subdivision (City and CSD subdivision) populations from one time period to another are not only due to natural population change and migrations, but may also be due to the reassignment of residential addresses as additional administrative data become available.
