1 - Canadian territorial enclaves abroad. These include embassies, consulates, military bases, scientific stations, information or immigration offices, aid agency offices, and central bank representative offices with diplomatic immunity

Note to readers:

- The Provincial and Territorial Culture Indicators (PTCI) were developed as an extension of the more comprehensive Provincial and Territorial Culture Satellite Account. The PTCI cover culture (including arts and heritage) and sport across Canada in terms of output, nominal gross domestic product (GDP), and jobs for the period from 2010 to 2021.
- All the GDP figures in this release are expressed in nominal, basic prices. Total economy GDP is calculated using income-based GDP at market prices minus taxes less subsidies on products and imports.
- Culture GDP is the economic value added associated with culture activities. This is the value added related to the production of culture goods and services across the economy, regardless of the producing industry.
- Sport GDP is the economic value added associated with sport activities. This is the value added related to the production of sport goods and services across the economy regardless of the producing industry.
