

Yukon Employment January 2023

Highlights

- In January 2023, Yukon's unemployment rate (3.7%) decreased by 1.2 percentage points compared to December 2022 (4.9%).
- Compared to December 2022, Yukon's labour force decreased by 600 to 24,100, the number of employed decreased by 300 to 23,200 and the number of unemployed decreased by 300 to 900.
- Nationally, the January 2023 unemployment rate (5.0%) remained the same as in December 2022.
- Compared to December 2022 figures, the labour force in Canada increased by 0.7%; the number of employed increased by 0.8%; and the number of unemployed increased by 0.2%.

Note: Statistics Canada revises Labour Force Survey (LFS) data annually to ensure alignment with the most recently available population estimates, geographic boundaries, and occupation and industry classifications. This standard revision process — which has little impact on key labour market indicators such as employment and the unemployment rates — ensures that the LFS continues to paint a complete and accurate picture of labour market conditions. Figures presented in this report are preliminary. Revised figures will be published as they become available.

Unemployment Rate, Provinces and Territories, January 2023

January 2023 Yukon Employment at a Glance:

Labour Force.....24,100
Employed.....23,200
Unemployed.....900
Unemployment Rate...3.7%
Employment Rate.....69.3%

Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components will not always add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Comparisons with Canada, Provinces and Territories - Snapshot

Participation Rate, January 2023

Employment Rate, January 2023

The participation rate measures the percentage of the population aged 15 years and over, which is working or actively looking for work. In January 2023, Yukon's participation rate was 71.9%, the second highest in Canada following the Northwest Territories (72.4%), and 6.2 percentage points above the national average (65.7%).

The employment rate measures the percentage of the population aged 15 years and over, which is employed. Yukon's January 2023 employment rate was 69.3%, the highest in Canada, and 6.8 percentage points above the national average (62.5%).

Comparisons with Canada and Selected Provinces - Historical

The Labour Force Survey estimates that 71.9% of people in Yukon aged 15 years and over were employed or seeking employment in January 2023.

Yukon's participation rate in January 2023 (71.9%) decreased by 1.8 percentage points compared to December 2022 (73.7%) and decreased by 1.9 percentage points compared to January 2022 (73.8%).

The January 2023 employment rate of 69.3% decreased by 0.8 percentage points compared to December 2022 (70.1%) and decreased by 2.4 percentage points compared to January 2022 (71.7%).

Historically, Yukon's participation rate and employment rate trended similar to those of Alberta. In recent periods, however, Yukon's rates have generally been higher than Alberta's. Also, in spite of being 3-month moving averages, Yukon's data series fluctuate more than Alberta's relevant monthly data series.

Employment by Age and Sex, January 2021 - January 2023

Unemployment Rate by Age and Sex, January 2021 - January 2023

- Comparing January 2023 to December 2022, the unemployment rates for males aged 15 years and over increased to 4.9% from 4.8%, while the rate for males 25 years and over increased to 4.5% from 2.7%. Over the same period, the rate for females aged 15 years and over decreased to 4.2% from 2.6%, while the rate for females aged 25 years and over decreased to 2.9% from 3.7%.
- The unemployment rate for Yukon's youth (aged 15-24 years) decreased from 15.4% in December 2022 to 8.7% in January 2023.

Employment, *Unadjusted*, by Full-time/Part-time, January 2023

Full-time employment as a percentage of all employment, January 2021 - January 2023

- Of employed people in Yukon aged 15 years and over, 19,200, or 83.5%, were employed full-time in January 2023. Yukon had the third-highest proportion of full-time employment among provinces and territories. In Canada, 81.3% of employed persons worked full-time in January 2023.
- Of employed Yukon males, 87.2% worked full-time, compared to 79.6% of employed Yukon females.

Employment, *Unadjusted*, by Industry, January 2023

	Both Sexes	Males	Females
Total employed	23,000	11,700	11,300
Goods-producing sector	2,900	2,600	300
Construction	2,100	1,900	0
Services-producing sector	20,200	9,100	11,000
Trade	2,200	1,100	1,100
Transportation and warehousing	900	800	0
Finance, insurance, real estate and leasing	600	200	500
Business, building and other support services	300	300	0
Educational services	2,400	600	1,800
Health care and social assistance	3,300	900	2,500
Information, culture and recreation	1,400	800	600
Accommodation and food services	1,100	500	700
Other services	1,000	500	500
Public administration	5,000	2,400	2,600

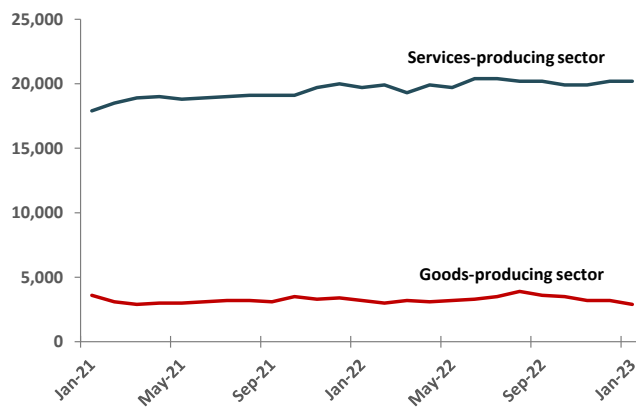

x = suppressed

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding. 'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

- In January 2023, 20,200, or 87.4% of those employed in Yukon, were employed in the services-producing sector, while 2,900, or 12.6%, were employed in the goods-producing sector.
- Of those working in the goods-producing sector, 72.4% had jobs in the construction industry.
- While females (11,000) accounted for 54.7% of workers in Yukon's services-producing sector, only 10.3% of the goods-producing sector workers were female (300).

Goods- and Services-Producing Sectors, January 2021 - January 2023

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

- Employment in Yukon's goods-producing sector peaked in July 2019 with 4,700 workers. Employment in the services-producing sector reached a record-high level (20,400) in June and July of 2022.

Public and Private Sectors, *Unadjusted*, January 2023

	Both Sexes	Males	Females
Total employed	23,000	11,700	11,300
Public Sector Employees	10,200	4,500	5,700
Total Private Sector	12,800	7,200	5,600
Private Sector Employees	9,500	5,200	4,300
Self-Employed	3,300	2,000	1,300

Note: Data may not add up to the totals due to rounding.

- In January 2023, of all those employed: 44.3% were public sector employees; 41.3% were private sector employees; and 14.3% were self-employed.
- The proportion of those in the private sector who were self-employed was 25.8%.

Public/Private Sector Employment, January 2021 - January 2023

Notes: 'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial or municipal level; a First Nation or other Aboriginal government; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated.

Note: Labour Force Survey (LFS) data for the territories are three-month moving averages based on the information collected for the third week of each month.

Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the June 2021 unemployment rate of 6.8% is actually an average of the unemployment rates for the months of April, May and June. July’s unemployment rate became the average of the rates for May, June and July. Because they are three-month moving averages, the territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
