The data contained in this publication are from Canada Revenue Agency (CRA) from T1 Income Tax and Benefit Returns. Province or territory of taxfiler for 'Final Statistics' is based on residence as of December 31 of the tax year. For the tax years from 2009 to the reference year of this publication, 'Final Statistics' are based on all returns, including reassessments up to June 30th of year following filing date for any given tax year.

'Individual Tax Statistics by Area' (formerly Locality Code Statistics) is based on the tax filer's postal code and place name as it appears in mailing address to determine the locality code (based on Statistics Canada's Standard Geographical Classification) and includes reassessment information up to June 30th of the given tax year plus two years.

Except where noted, 'number of returns' refers to all returns filed (taxable and non-taxable returns). Some returns are filed for the sole purpose of the GST Credit and/or Child Tax Benefit. All figures are reported in current-year dollars and have not been adjusted for inflation. Statistics pertaining to less than ten taxfilers have been suppressed, however they are included in the subtotals and totals. All counts of the number of taxfilers have been rounded to the nearest multiple of ten. Subtotals and totals were rounded independently. Thus, due to rounding and suppression, number in a row or in a column may not add up to the respective total.
