Net interprovincial migration is the difference between the number of in-migrants and the number of out-migrants. The number of interprovincial migrants is final up to 2020/2021 and preliminary for 2021/2022.

2. Age on July 1st.

3. The number of immigrants is final up to 2020/2021 and preliminary for 2021/2022.

4. The number of emigrants is final up to 2019/2020, updated for 2020/2021 and preliminary for 2021/2022.

5. The number of returning emigrants is final up to 2019/2020, updated for 2020/2021 and preliminary for 2021/2022.

6. The net temporary emigrants is final up to 2019/2020, updated for 2020/2021 and preliminary for 2021/2022.

7. A non-permanent resident is a person who is lawfully in Canada on a temporary basis under the authority of a valid document (work permit, study permit, Minister's permit or refugee) issued for that person along with members of his family living with them. This group also includes individuals who seek refugee status upon or after their arrival in Canada and remain in the country pending the outcome of processes relative to their claim. The net non-permanent residents is final up to 2019/2020, updated for 2020/2021 and preliminary for 2021/2022.

8. Age -1 year represents persons born after July 1st and not included in the age group of 0 to 4 years.

Note: Annual figures represent the period of July 1st to June 30th; i.e., 2021/2022 figures cover the period from July 1, 2021 to June 30, 2022.

- The exploration work phase is defined as the search for, discovery, and first delimitation of a previously unknown mineral deposit or the re-evaluation of a sub-marginal or neglected mineral deposit in order to enhance its potential economic interest based on delimited tonnage, grade, and other characteristics. The phase is completed when a deposit has sufficient indicated mineral resources accompanied by a positive scoping study (preliminary economic assessment that justifies additional, more detailed, and costly deposit appraisal work).
- The deposit appraisal work phase is defined as the steps undertaken to bring a delimited deposit, by definition drilling, comprehensive tests, and planning, to the stage of detailed knowledge required for a complete feasibility study that will justify and support a production decision on the large investment required.
- Expenses that support work on and off mine sites; they are allocated to engineering, economics, and pre- or production feasibility studies, the environment, land access and field work. They also include associated general expenses.

Note: Exploration and deposit appraisal activities include only the search for and appraisal of deposits and do not include work for extensions of known reserves.
