

# YUKON BUREAU OF STATISTICS

## Population Report Second Quarter, 2019

### Highlights:

- The estimated population of Yukon on June 30, 2019 was 41,352; an increase of 709, or 1.7%, compared to the revised figure for June 30, 2018 (40,643).
- Comparing June 30, 2019 to June 30, 2009, Yukon's population increased by 7,195, or 21.1%. The population of the Whitehorse area increased by 6,226, or 23.9%; Dawson City increased by 460, or 24.2%; and Watson Lake decreased by 75, or 4.8%.

**Notes on methodological changes:** Prior to 2012, the Yukon Bureau of Statistics (YBS) produced population estimates twice a year. Effective 2012, the estimates are produced quarterly.

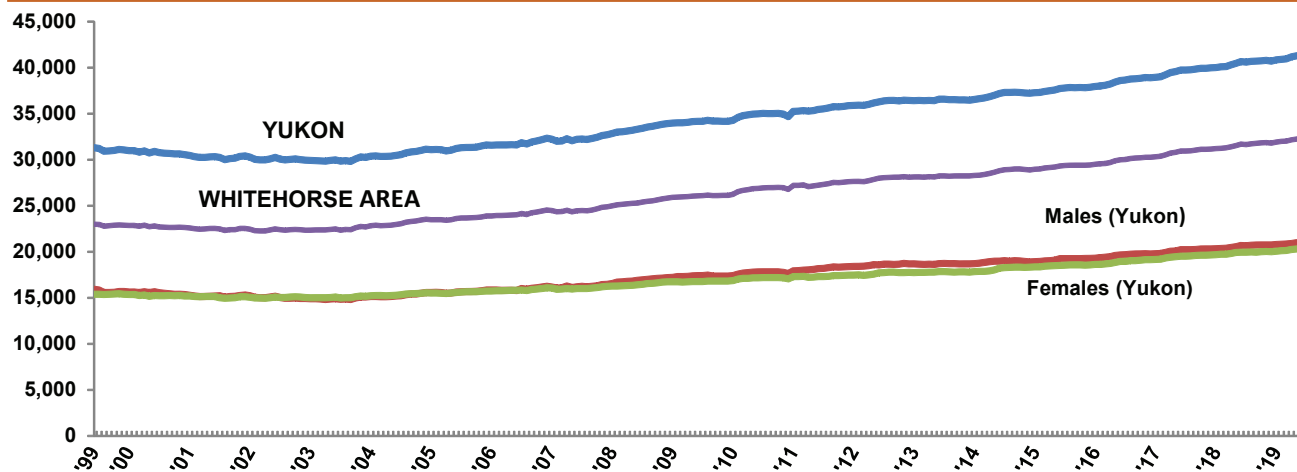

Population estimates prior to June 2010 were based on information in Yukon Health Care Insurance Plan (YHCIP) files and a semi-annual health care update survey that estimated the number of plan members who were no longer Yukon residents. In 2010, the estimation model was revised and the population counts for June 2010 through December 2014 were derived by tracking changes in YHCIP files and other administrative data files. In 2015, the model was further revised to make it more comprehensive and to improve accuracy based on information in all available and applicable administrative data files of the Yukon government. In addition, the total population estimates for April 2011 onwards are being calibrated to post-censal population estimates adjusted for net undercoverage.

The new model assigns residents of unorganized areas to their nearest communities. Estimates for Whitehorse now include population in surrounding areas *as well as in Marsh Lake* to remain comparable with the geographical area defined by Statistics Canada as the Whitehorse Census Agglomeration.

All monthly estimates are as of the last day of the month. The June estimates represent annual figures.

Due to the change in methodology in 2015, figures presented in this publication for the period from April 2011 onwards are not strictly comparable to figures prior to the period.

### Monthly Population, June 30, 1999 to June 30, 2019

- Yukon's population declined almost steadily from 1999 to 2001, and then fluctuated around 30,000 from 2001 to 2003.
- From 2004 through 2014, the population increased almost steadily in most quarters of every year except in 2013. From 2015 onwards, the upward trend in population growth gained momentum with very high growth rates recorded in many quarters, most of them being in 2016 and 2017. The June 30, 2019 population at 41,352 is the new record-high for Yukon.
- On June 30, 2019, Yukon's population (41,352), increased by 390 people, or 1.0%, from March 31, 2019, and increased by 709 people, or 1.7%, from June 30, 2018 (revised 40,643).

<sup>1</sup> Accurate population counts during the Gold Rush are not available. However, the first Census population figure for Yukon was 27,219 in 1901.

## Population by Subdivision in Whitehorse Area

**Note:** Residents of Whitehorse area are assigned to subdivisions based on their addresses in various administrative files. Some addresses in these files appear inconsistent or incomplete. Efforts have been made to resolve any apparent inconsistency or incompleteness of information by validating the information against multiple sources. Changes in subdivision populations from one time period to another are not only due to natural population change and migrations, but may also be due to reassignments of previously inaccurate addresses on file.
