KLUANE FIRST NATION - COMMUNITIES OF BURWASH LANDING & DESTRUCTION BAY

COMPLIMENTS OF KFN PHOTO GALLERY

Kluane First Nation History

Along the western shore of Kluane Lake, the largest lake in Yukon, are two of the territory's smaller communities, Burwash Landing and Destruction Bay. The communities are located in the Shakwak valley, on the perimeter of Kluane National Park and the Tachal Region. Burwash Landing is on the Alaska Highway about 285 kilometres from Whitehorse and 127 km northwest of Haines Junction. Destruction Bay is also on the highway, 19 km southeast of Burwash Landing and slightly closer to Haines Junction.

Towards the end of the 1950's the Federal Government began to organize native communities into "bands" with elected "Chief and Councils" and with that came the establishment of the Burwash Band. A few years later, the Burwash and White River bands were joined and were renamed the Kluane Indian Band, existing as one Band until 1990 when the two separated into two distinct First Nations, the Kluane First Nation and the White River First Nation.

Burwash Landing is now home of the Kluane First Nation, a Southern Tutchone people who have inhabited the Kluane area for countless generations. The current site of Burwash Landing was a traditional summer camp location. After the Jacquot brothers built a trading post in the early 1900s, First Nations people began to settle nearby. Burwash Landing had its 100th anniversary in 2004. Following construction of the Alaska Highway, Burwash became the administrative centre for the Kluane First Nation.

Destruction Bay has a much shorter history. It was established as a centre for construction and maintenance on the Alaska Highway, and that remains its primary role today.

Radiating from the shores of the Kluane Lake in all directions is Ä sì Keyi, (My Grandfather's Country). Ä sì Keyi is made up of Boreal forest hemmed in by the Ruby and Nisling mountain ranges to the northeast and the St. Elias Mountains to the southwest. The Kluane Lake area is the traditional territory of the Lù'àn Mǎn Kù Dǎn, the Kluane Lake People. The majority of the First Nation people from this area identify themselves as descendants of Southern Tutchone speakers and follow a matriarchal moiety system of two clans, Khanjet (Crow Clan) or Ägunda (Wolf Clan). However, many ancestors of the Kluane First Nation came from nations such as the Tlingit, Upper Tanana and Northern Tutchone. Today, many Kluane First Nation members primarily identify themselves as either Tlingit or Southern Tutchone.

The Kluane First Nation administers the following departments in order to provide the services necessary to meet the needs of the members of their community: Finance & Administration (internal support and central services), Human Resources & Post Secondary Education (employment, post-secondary and adult education), Lands, Resources and Heritage (lands, renewable resources and heritage), Economic Development, Public Works & Municipal Services (water septic, housing and maintenance), Health & Social Services (community wellness, youth and elders), and Governance (implementation of Final Agreement).

This First Nation Community Profile was researched and compiled by Mr. Joseph Fred, First Nations Statistician, as part of a training program supported by the Government of Yukon and Statistics Canada, in cooperation with Yukon First Nations.

Kluane First Nation Self-Government Agreement

Land Claim Agreements

The Kluane First Nation signed Final and Self-Government Agreements with Yukon and Canada on October 18, 2003. The Effective Date of these agreements was February 2, 2004.

Government Structure

The Kluane First Nation government structure is established by its Constitution, which was developed according to the Self-Government Agreement. Among other things the Constitution establishes the five branches of the Kluane First Nation government: the General Assembly, the Council, the Elders Council, the Youth Council and the Kluane First Nation Court.

Traditional Territory

The Traditional Territory of the Kluane First Nation is situated in southwestern Yukon, centred on the unincorporated village of Burwash Landing. In very generalized terms, this area of historic use and occupation extends from the southeastern end of Kluane Lake northwest to the Alaska border and from the St. Elias Mountains north to the Donjek-White River confluence. The Kluane Traditional Territory overlaps completely with that of the White River First Nation (which has not negotiated a final land claim agreement as of 2009), although each has identified a smaller 'core area' of use exclusive of the others.

Settlement Land and Special Management Areas

Through the terms of the Umbrella Final Agreement, the Kluane First Nation owns the following Settlement Land:

- 647.5 km² of Category A Land – meaning that the First Nation owns both the surface of the land as well as what is below it (such as minerals and oil and gas).
- 259 km² of Category B Land – meaning that the First Nation owns the surface of the land but not what is below the surface.
- 6.81 km² of land allocated per section 4.3.4 of the Final Agreement.

The Kluane First Nation Final Agreement created two new Special Management Areas – Pickhandle Lakes Habitat Protection Area; and Asi Keyi Natural Environment Park. The former is to be designated under Yukon's Wildlife Act; while the latter is to be designated under Yukon's Parks and Land Certainty Act. The Kluane Agreement also includes certain provisions with respect to Kluane National Park and Park Reserve.

Heritage Sites

The Kluane First Nation Final Agreement identified sixteen heritage routes to which specific provisions in the Final Agreement apply.

Financial Compensation

In accordance with the terms of Chapter 19 of the Umbrella Final Agreement, the Kluane First Nation became entitled, on the Effective Date of its Final Agreement, to its share of the financial compensation package provided by Canada. This amounted to \$10,016,557, as measured in 1989 dollars. The Final Agreements include formulae for determining each First Nation's Adjusted Final Share; in the case of the Kluane First Nation, factoring in interest, this resulted in 15 annual payments of \$1,466,053 starting on the date the Agreement was signed (October 18, 2003).

Taxation

As a self-governing Yukon First Nation, the Kluane First Nation has the authority for taxation, for local purposes, of interest in Settlement Land and of occupants and tenants of that land. The First Nation is also able to enter into 'tax sharing' arrangements with Canada and Yukon regarding the sharing of tax-generated revenue. The Kluane First Nation passed the Kluane First Nation Income Tax Act in 2004. The Kluane First Nation is responsible for paying property taxes for some, but not all Settlement Land, in accordance with Chapter 21 of the Final Agreement. Property taxes are not paid on unimproved rural Settlement Land.

Economic Development Measures

Chapter 22 of the Kluane First Nation Final Agreement provides for certain economic development measures intended to provide Yukon Indian People with opportunities to participate in the Yukon economy and to ensure they obtain economic benefits that flow directly from the Agreement.

¹CAFN - Custom grouping for all responses associated with Aishihik, Champagne and Champagne Aishihik First Nation.

²NND - For the 2006 Census, the municipal boundaries were used; therefore, for Mayo, a large number of NND members were included in 'Yukon Unorganized' rather than Mayo.

³LFN - Home Community is comprised of Census subdivisions of Watson Lake, Upper Liard, Two Mile Village and Two and One Half Mile Village.

⁴TTC - Home Community is comprised of Census subdivisions of Teslin and Teslin Post 13.

Note: Many Yukon communities, as represented by Census subdivisions (*Champagne Landing 10; Ibex Valley; Destruction Bay; Two Mile Village; Two and One-Half Mile Village; Lake Laberge*) have very small First Nation populations. In order to maintain confidentiality, detailed information on these census subdivisions is largely suppressed, and therefore not included.

DEFINITIONS

Aboriginal identity population: Aboriginal identity refers to those persons who reported identifying with at least one Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian, as defined by the *Indian Act of Canada*, and/or those who reported they were members of an Indian band or First Nation.

Aboriginal population: There are different ways to identify the Aboriginal population based on four questions asked in the census (Aboriginal identity; member of an Indian Band/First Nation; Registered or Treaty Indian; and ethnic origin, including Aboriginal ancestries) depending on the focus and the requirements of the data user.

Area suppression for income characteristic data: When applied for data quality purposes, is used to replace all income characteristic data with zeroes for geographic areas with populations and/or number of households below a specific threshold. Income characteristic data are zeroed out for areas where the population is less than 250 or where the number of private households is less than 40.

Category 'A' Settlement Land: Land which has been identified pursuant to 5.3.1, declared pursuant to 5.12.1.1, or designated pursuant to 7.5.2.8 (a) to be Category A Settlement Land and which has not ceased to be Settlement Land in accordance with 5.11.0. (includes subsurface mines and minerals).

Category 'B' Settlement Land: Land which has been identified pursuant to 5.3.1, declared pursuant to 5.12.1.2, or designated pursuant to 7.5.2.8 (b) to be Category B Settlement Land and which has not ceased to be Settlement Land in accordance with 5.11.0. (does not include subsurface mines and minerals).

Census family: Refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone parent of any marital status, with at least one child living in the same dwelling. A couple may be of opposite or same sex. 'Children' refer to blood, step- or adopted sons and daughters (regardless of age or marital status) who are living in the same dwelling as their parent(s), as well as grandchildren in households where there are no parents present.

Census subdivision types: City (CY); Indian Reserve (IRI); Settlement (SÉ); Unorganized (NO); Town (T); Village (VL).

Economic family: Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption. A couple may be of opposite or same sex. Foster children are included.

Employed: Persons who, during the week (Sunday to Saturday) prior to Census Day (May 16, 2006): 1. did any work at all for pay or in self-employment or without pay in a family farm, business or professional practice or, 2. were absent from their job or business, with or without pay, for the entire week because of a vacation, an illness, a labour dispute at their place of work, or any other reasons.

Employment rate: Refers to the number of persons employed in the week (Sunday to Saturday) prior to Census Day (May 16, 2006), expressed as a percentage of the total population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, geographic area, etc.) is the number of employed persons in that group, expressed as a percentage of the total population, in that group.

Fee Simple Settlement Land: Land which has been identified pursuant to 5.3.1, declared pursuant to 5.12.1.3, or designated pursuant to 7.5.2.8 (b) to be Fee Simple Settlement Land and which has not ceased to be Settlement Land in accordance with 5.11.0. (fee simple Settlement Land is owned under the same form of fee simple title as is commonly held by individuals who own land).

Household: Refers to a person or a group of persons (other than foreign residents) who occupy the same dwelling and do not have a usual place of residence elsewhere in Canada. It may consist

of a family group (census family) with or without other persons, of two or more families sharing a dwelling, of a group of unrelated persons, or of one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household. Unless otherwise specified, all data in household reports are for private households only.

Median age: The point where exactly one-half of the population is older and the other half is younger.

Median income: The point where exactly one-half of income recipients aged 15 years and over has more income and the other half has less income.

N.I.E.: not included elsewhere.

N.O.S.: not otherwise specified.

Participation rate: Refers to the labour force in the week (Sunday to Saturday) prior to Census Day (May 16, 2006), expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, geographic area, etc.) is the total labour force in that group, expressed as a percentage of the total population in that group.

Postsecondary education: Educational attainment above the level of secondary (high school) completion. This includes apprenticeship or trades certificate; college or CEGEP diploma; university certificate or diploma below bachelor level; university degree at bachelor's degree and above.

Random rounding: All counts in census tabulations are randomly rounded either up or down to a multiple of '5', and in some cases '10', providing strong protection against disclosure. Similarly, percentages, which are calculated on rounded figures, do not necessarily add up to 100%. A value of "0" in any given cell represents one of the following: 1) value is actually zero; 2) value may be random rounded to zero; or 3) value is more than zero but is suppressed for confidentiality reasons.

Settlement Land: Category A Settlement Land, Category B Settlement Land or Fee Simple Settlement Land.

Total Income: Total of income from all sources, including employment income, income from government programs, pension income, investment income and any other money income.

Unemployed: Persons who, during the week (Sunday to Saturday) prior to Census Day (May 16, 2006), were without paid work or without self-employment work and were available for work and either: 1. had actively looked for paid work in the past four weeks; or 2. were on temporary lay-off and expected to return to their job; or 3. had definite arrangements to start a new job in four weeks or less.

Unemployment rate: Refers to the unemployed expressed as a percentage of the labour force in the week (Sunday to Saturday) prior to Census Day (May 16, 2006). The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the unemployed in that group, expressed as a percentage of the labour force in that group, in the week prior to enumeration.
